A REAL ESTATE ROMANCE. —In the sudden rise to fortune that comes of unexpected value in corner lots, many a romance unwinds itself that, in the hands of an expert play writer or novelist, would make something worth bearing or reading. The rich uncle who used to come in at the right moment from Iudia, now turns up from Chicago, and in a fine suit of broadcloth, and under a silk stovepipe, with no end of gold chain festooned from his vest, says, "Bless you my children,' to low music and a slow curtain.

A friend who has very kindly given me the inner life and outer prosperity of this wonder ful place, told me of an affair that, but for its location, one would set down as a tale from the Ledger, written by Henry Ward Beecher, Senator John Sherman, or some other dealer

in imaginary literature. It seems that there was a poor cooper, living within two miles of the court house, who own ed a patch of land that was about as barren, worthless, and miserable in its low, sandy, wet condition as any bit of real estate in the distant swamp. But the cooper, whose wife had shak on herself out of this wet location, in our vale of tears, had a daughter that was as fair to look upon as his land was miserable. She was bare legged and ragged, but the legs were won deriully perfect, the graceful figure and sweet face appearing all the more attractive from their

unadorned condition. One fine morning the old cooper wakened to the unhappy fact that his only child had toseduced by the son of a wealthy man, and the maker of hoops and staves drove his hand adze into his wooden horse, and swore to be avenged. He claimed that his daughter had been married through a mock marriage, and he sought by law to force the scoundrel to mar ry the victim. But having no money, he was only laughed, at although he got together some ugly looking papers to sustain his assertions. He tried to sell his swamp, and although prop erry in real estate was even then looking up, no one would give him five dollars an acre for his ground. To the poverty that came of his neglected work the poor old creature of bung heart and too much bad whisky. After his appeared from the sight of society, high and low, in Chicago.

In the meantime the wonderful town spread and improved. It grew to givantic propor tions, and soon the poor departed cooper's tract became to be desirable. Longing, speculative eyes were turned meen it, but no one was about to sell or even lesse. At last a full stomached, hald-headed gentleman possessed himself of all the tax titles and went on boldly to fill up and improve. Over the waste, sandy tract of the departed maker of whisky barrels one of the most substantial blocks represented a large

fortune. Some fourteen years passed in this way, af ter the disappearance of the poor, ruined girl, when one morning the full stomached, bullheaded speculator was called upon by a maironly looking female, accompanied by a beau tiful girl of sixteen, and this woman claimed to be the daughter of the cooper, and quietly

asked a restitution of her father's property. Old blady was not taken aback. He was prepared for this-and not only claimed the property under his tax titles, but upon a ground that could not have originated in any place but Chicago. He claimed to be the husband of the poor woman and the father of the child. He asserted that the marriage was no fraud, but a real marriage, and he was as tender and scutimental in this as he was firm in the de

fense of what he called his legal rights. And now begun an odd contest. The woman was as eager to prove the ceremony a fraud as she had once been anxious to sustain its validity, while her seducer, in like manner, passed from the one side to the other. It was eventually compromised by securing the property to the child after the death of the father and a hand some allowance to the quasi wife. - Cincinnati Commercial.

A MASONIC PROJECT .- In Tennessee the Masonic fraternity have projected a plan for taking care of the widows and orphans of deceased brothers of the "mystic tic." In each has been found absolutely necessary to use only grand division of the State a thousand or more the smallest size of coal, this stove has been so acres of land are to be acquired by gift or pur chase, and this land will be cut up into small lots of one or two acres, with a small cottage on each lot. A portion of the land will be reserved for a school house and church, thus making the locality a sort of community by itseif. In most cases there will be children old enough to care for the land, raising vegetables and fruits for the market, and any deficiency of food and raiment will be supplied from the benevolent fund of the grand division. The seventy-two Masonic lodges of the State have already raised nearly eighty thousand dollars toward the object to be accomplished, and by another year will have raised the amount de another year will have raised the amount de sired, before making a practical test of the project.

nov 20-tf THE STEWART PARLOR BASE-BURN. ING STOVE.

The increasing demand for a first class and reliable base-burning and self feeding stove which has been pressing upo all stove dealers so much of late, has induced the inventor and manufacturers of the celebrated STEWART STOVES to turn their attention in that direct story. tion, and the result is the production of a stove which for beauty of design, economy in the use of fuel, capacity for heating, and completeness in all its operations, is unsurpassed by any stove now in the market.

designed to overcome the great objection which has been raised against most of the self feeders now in use, namely, the inordinate consumption of fuel. The Stewart Parlor Base-Burner being provided with a brick lined fire pot and complete ages hypering arrangements. complete was burning arrangements, generates a steady and powerful heat, which by the use of the draft damper is under perfect control, so that the heat may be radiated to suit the temperature of the room and a moderate or strong degree of heat thrown out as the will or pleas ure of the operator may desire, thereby secur-ing a saving of at least one third of the amount of fuel consumed in stoves which cannot be

thus controlled.

Cheerfulness—This stove is provided with mica doors arranged just above the fire box. and encircling almost the entire body of the stove These doors are nicely hinged so that they can be opened at any time and the mice cleaned with the utmost facility, and when the fire is burning a steady and brilliant illumination is produced, thereby securing a cheerfulness and comfort equal to that of an open grate

or hearth fire

Cleanliness - Being provided with a Patent
Reversible Grate, which is easily shaken or
dumped, and a large ash drawer in the base of the stove, no difficulty whatever is experienced from the escape of cinders or a hes into the room while shaking or dumping the grate.

Size of Coal-While in other base burners it constructed with its improved magazine and grate that the larger sizes of coal, ordinarily burned in parlor stoves, may be used with the best results. This is an important advantage, as the larger sized coal is purer and produces a greater heat, and prevents the waste arising from so much fine fuel falling through the grate. This stove is effered to the public with the full belief that it contains better heating and economizing features than any other base burn er now in use. Persons desiring a new stove are requested to give it a thorough examination and satisfy themselves that it is the best. I refer to the following persons who have the Stewothers of our city-all of whom unite in recommending it.

I keep also on hand a full assortment of WOOD and COAL STOVES The celebrated STEWART COOKING STOVE, with latest improvements, of the different sizes, turnished.
